Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, 33 and 34 drawn to a polymetaphenylene isophthalamide porous film.

Group II, claim(s) 8-24, drawn to a process of making a polymetaphenylene isophthalamide porous film.

Group III, claim(s) 25-32, drawn to a laminate.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: All the groups are directed to an article and a process useful in the general field of the battery separators. Group I has a special technical feature directed to a porous film having a porosity of 60 to 80% not required for Groups II and III. Group II has a special technical feature directed to a casting a dope prepared by dissolving a polymer in a solvent not required for Groups I and III. Group III has a special technical feature directed to a heat-melting thermoplastic polymer porous layer not required for Groups I and II.

A telephone call was made to John K. Shin on 08/02/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1771

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
